

USER MANUAL

DR. SWAMP

CONGRATULATIONS

on your purchase of Dr Swamp, the renowned twin distortion pedal from T-Rex Engineering.

Dr Swamp gives you two great classic distortion pedals in a single box. You can switch between rhythm and lead settings, or set it up to deliver two different lead sounds. the choice is yours – turn the page to see how it works.

TWIN DISTORTION

Your Dr Swamp pedal is easy to set up – and even easier to use on stage.

The pedal features two identical channels of classic distortion – each with its own ON-OFF switch.

Hit the left switch and you'll turn on the left channel. Step on the right switch and you'll toggle from the left to the right channel. Whichever channel you're on, hit the switch again to turn the pedal off.

BOTH CHANNELS OF YOUR DR SWAMP HAVE A GAIN, LEVEL AND TONE KNOB.

- GAIN** controls the level of distortion for the channel.
- LEVEL** governs the overall volume – with 1:1 at 12 o'clock.
- TONE** lets you turn up or pull back on the edge of your distortion, for extra control over your own sound.
