

MUDHONEY II

**DUAL
DISTORTION**

By **T-REX Effects** - Denmark

CONGRATULATIONS

on your purchase of Mudhoney II, a dual channel version of our first distortion pedal. Mudhoney II was designed for those that really dug the Mudhoney but needed two of them to cover the sounds they needed. With the Mudhoney II, you can switch between two identical distortion circuits but set the controls just as if it was two pedals – the settings on one does not affect the other in any way.

At each stage along the way, you've got complete control over gain, tone, boost and level so you can decide freely what the difference between ch. A and B should be. Only a boost in volume? A boost in gain AND volume? Less treble? It's all possible with the Mudhoney II!

MUDHONEY II CONTROLS

Your Mudhoney II has 4 controls for each channel: **GAIN**, **LEVEL**, **tone** and **BOOST**.

Gain sets the amount of distortion, going from a light crunch to rock lead saturation. Use the **LEVEL** knob to set the overall output volume from the pedal. At 12 o'clock the output level is roughly the same as when the pedal is bypassed. Turning it all the way up (clockwise) will boost your output signal by 15 dB.

The **tone** knob lets you control the top end, or "edge", of your signal. Moderate settings seem to work best, but you can get darker sounds with low settings.

Use the **BOOST** switch to switch between moderate and high gain for each channel separately. This switch works in conjunction with the

gain knob and can be used as a global “gain range” switch for the selected channel.

The **on/off** switches work mutually exclusive, so if you want to go from one channel to the other, just press the associated switch and the other one will shut off automatically. That’s another cool feature that having two independent pedals won’t give you.

TECHNICAL SPECS

Input Impedance	500K Ohm
Output Impedance	Lower than 1K Ohm
Power supply	9 VDC · 2,1 mm barrel plug · 
Current draw @ 9 VDC	20 mA
Max. input level Vp-p	1,5 V p-p
Battery type / Battery life	9V battery / 24 hours (Alkaline)
External connectors	Input Jack, Output Jack, 9V DC Jack
Controls	2x Gain, 2x Level, 2x Tone, 2x Boost, 2x On/Off
Pedal size incl. knobs (W x H x D)	100 x 55 x 120 mm / 3.9 x 2.2 x 4.7 in
Weight excl. battery & packaging	0.350 kg / 12.3 oz

T-Rex warranty conditions

T-Rex offers a 2-year warranty on all our products. In the unlikely event of a malfunction, please contact our technical support at service@t-rex-effects.com before sending us the product for repair. Read more about warranty conditions at www.t-rex-effects.com/service

About T-Rex

Based in Vejle, Denmark, T-Rex Effects makes classic and signature effects pedals for the world's best musicians. Our approach blends hi-tech innovation with old-world craftsmanship – always in the service of killer tone.

EU regulations • Environment protection

T-Rex accepts and follows the regulations and directives issued by the EU. We find these environment protecting regulations very good, and we are happy to follow them.
